

DEFINITIONS

- 1) **A Health Service Provider in Psychology** is defined as a psychologist, certified/licensed or registered to practice independently in his/her province/territory, who is duly trained and experienced, and whose professional practice includes the delivery of health promotion, or preventive services, or direct assessment and therapeutic intervention services to individuals, couples, families, or groups whose growth, adjustment, or functioning is actually impaired or is demonstrably at risk of impairment.
- 2) **An Organized Health Service Setting** is an organization, institution or agency, or part thereof, established to provide health and/or mental health care services, with defined health service programs and a defined system of supervision. They could include a general hospital, a mental/psychiatric hospital or a rehabilitation hospital, an auxiliary hospital, a mental health/rehabilitation clinic, a CLSC or CSS, and psychology services of school boards, colleges and universities, as well as others as may from time to time be designated by the Board of Directors.
- 3) **A Health Service Setting** is an institution or organization or part of an institution or organization established and clearly identified as existing for the provision of health services, or an office, or equivalent facility from which a health service provider in psychology offers a psychological service to a client or clients for a fee.
- 4) **Supervised Experience** means acceptable experience under the supervision of a person acceptable to the Board.
- 5) **Registered, Certified, or Licensed** means registered, certified, or licensed by a provincial/territorial regulatory organization for the independent practice of psychology in that province or territory.
- 6) **Independent Practice** means practice without the statutory or regulatory requirement for supervision.
- 7) **Four years of post-doctoral experience** (without the qualifier "supervised") means a minimum of 6000 hours of acceptable experience in the practice of psychology accrued over a period of not less than four years. This definition applies to Criteria 2(1)(a)(b).
- 8) **Six years of post-Masters experience** (without the qualifier "supervised") means a minimum of 9000 hours of acceptable experience in the practice of psychology accrued over a period of not less than six years. This definition applies to Criteria 2(1)(a)(d).
- 9)
 - i. **One year of supervised experience** means a minimum of 1500 hours of acceptable experience which includes at least 100 hours of direct individual supervision, over a period of not less than 12 months.
 - ii. In the case of group supervision, 2 hours shall count as 1 hour in calculating the aggregate total.
 - iii. Acceptable supervised experience refers to direct, formal contact with a senior person who is responsible for the educational development and guidance of the supervisee. Acceptable supervised experience does **not** include classwork, or other course related experiences.
 - iv. Acceptable supervised experience is that in which health services in psychology are directly provided by the applicant to individuals or groups of patients/clients. The applicant's own personal growth experience (e.g., personal therapy, encounter groups) is **not** acceptable. Supervision of others is **not** acceptable.

Definitions in paragraph 9 i, ii, iii, iv apply to Criteria 1(1)(a)(b)(c), and 2(1)(a)(c) of the Criteria for listing.

- 10) Some "applied" graduate teaching can at times be construed as acceptable health service experience if this teaching is designed to provide students with health service skills (e.g., diagnostic abilities, interviewing skills, therapeutic intervention skills). Direct face-to-face supervision of clinical cases is a prime example. Such teaching, however, can never comprise more than 75% of the aggregate hours of health service experience necessary to qualify for listing.

CRITERIA FOR LISTING

Please note as well the attached information on changes to the eligibility criteria.

A. Regular Listing Category

Recognizing the current diversity of entrance to practice requirements in Canadian Provinces/Territories, the following options for eligibility shall be available during the first 25 years of existence of the Register:

- 1(1) Eligibility for listing with the Register requires that a person meets all the following criteria:
 - (a) Be registered, certified, or licensed for the independent practice of psychology in the province or territory in which the person practices.
 - (b) Have a doctorate degree acceptable to the regulatory organization in the province or territory in which the psychologist practices.
 - (c) Have two years of supervised experience in health service of which at least one year is postdoctoral and one year (may be postdoctoral year) is in an organized health service setting. (total min. 3000 hours)
- 1(2) Notwithstanding subsection 1(1)(a) above, a person who practises in a province or territory which does not have statutory provisions for the registration, certification or licensing of psychologists, may be listed in the Register provided:
 - (a) They hold a doctorate degree acceptable to the Register;
 - (b) Meet the requirements of subsection 1(1)(c) above.
- 2(1) Notwithstanding section 1, the following criteria of membership may be substituted for those in section 1:
 - (a) Be registered, certified, or licensed for the independent practice of psychology in the province or territory in which the person practices, and
 - (b) Have a doctorate degree acceptable to the regulatory organization in the province or territory in which the psychologist practices and have attained 4 years of experience in a health services setting, (total min. 6000 hours)
OR
 - (c) Have a master's degree acceptable to the regulatory body of the province or territory in which the psychologist practices and have attained 2 years of supervised experience in health service of which at least one year is postgraduate and one year (may be postgraduate year) is in an organized health services setting; (total min. 3000 hours)
OR
 - (d) Have a master's degree acceptable to the regulatory body of the province or territory in which the psychologist practices and have attained 6 years of experience in a health service setting. (total min. 9000 hours)
- 2(2) Notwithstanding subsections 2(1)(a)(b) and 2(1)(a)(c), and 2(1)(a)(d) above, a person who practices in a province or territory which does not have statutory provisions for the registration, certification or licensing of psychologists, may be listed in the Register provided they:
 - (a) Hold a doctorate degree acceptable to the Register and have attained 4 years of experience in a health services setting; (total min. 6000 hours)
OR
 - (b) Have a master's degree acceptable to the Register and 2 years of supervised experience in health service of which at least one year is postgraduate and one year (may be postgraduate year) is in an organized health services setting; (total min. 3000 hours)
OR
 - (c) Have a master's degree acceptable to the Register and 6 years of experience in a health services setting; (total min. 9000 hours)

B. Temporary Listing Category

3. Notwithstanding Sections 1 and 2, a person who
 - a) is registered, certified, or licensed for the independent practice of psychology in the Province or Territory in which the person practices, and
 - b) is engaged in the provision of psychological health services in an organized health service setting or a health service setting within the meaning of those terms as established by the Canadian Register of Health Service providers in Psychology,but who has not yet accrued the experience necessary for listing in the Register, may be temporarily listed in the Register for a period not to exceed six years from the date of initial temporary listing in the Register.
4. As a condition of continued temporary listing in the Register, the Temporary Listee shall be required to provide the Register with such information respecting the program of practice in an organized health service setting or a health service setting as the Register may from time to time require.
5. Temporary Listees shall acknowledge that the temporary listing does not give them any other rights beyond that of the temporary listing itself and that they must satisfy all requirements established by the Register for regular listing before regular listing shall be granted.

Explanatory Note

Psychologists admitted to temporary listing are subject to the same general conditions and the same privileges as Regular Listees. However, they must also complete an Annual Report on their provision of psychological health services. Temporary Listees subsequently receive an annual letter confirming the accrued experience which has been recognized the Canadian Register. When the criteria for regular listing have been met, Temporary Listees are transferred to the permanent list without any special charge or other formality.
